An icon representing every Controller plugged into the system appears on this screen. Up to five players may play if a Multi-Player Adapter is attached. In addition to selecting the team you control, you can select, enter, and delete user names to personalize your controller to track your user stats.

## MULTIPLAYER GAMES

The Multi-Player Adapter lets up to five players play competitively or cooperatively. Just plug the adapter into Controller Socket 2 on the Super NES, and you're ready to go.

**Note:** The Multi-Player Adapter is not designed for use with the Super NES Super Scope®, the Super NES Mouse®, or Controller Socket 1.

- To change the setting for your Controller, Control Pad ↔ to position the Controller symbol under either team to select that team or in the middle to select computer control.
- To toggle the control method, press the **L/R** buttons. When the control arrow points up, Control Pad **diagonally** to move up and down the court. When the control arrow points diagonally, Control Pad ↔ to move up and down the court.
- To cycle through player names, Control Pad ↑. Press **A** to select the highlighted name.

1. Highlight **DELETE** and press **A**. Highlight a user name, then press **X** to delete that name.
- When all players have pressed **A** to select their user names, press **START** to continue. The Pregame Introduction screens appear.

## PREGAME INTRODUCTION

Before the game, the Pregame Introduction screens set the stage for the basketball action to follow. First, the Game Introduction screen announces the teams and home court.

- To continue, press **START**. The Team Matchup screen appears.

- The Team Matchup screen compares the two teams. One to three basketballs indicate strength in each of five categories.

**SCORING:** Scoring ability.

**REBOUNDS:** Offensive and defensive rebounding.

**BALL CONTROL:** Passing and dribbling ability.

**DEFENSE:** Shot blocking and steals.

**OVERALL:** Overall matchup.

- To continue, press **START**. The player introductions introduce the starting players from both teams.
- To go directly to the tip-off, press **START**.

## THE TIP-OFF

Every game starts with a tip-off between the centers.

- To jump for the tip-off, press **X**.

## PLAYING THE GAME

At the main menu, choose one of the available game options and follow the onscreen menus to start a game. Once started, you control the man over the star/circle control symbol. On offense, you control the man over the star. On defense, the star changes to a circle. Depending on which Controller you're using, the control symbol has a different color:

Player 1	Blue
Player 2	Red
Player 3	Green
Player 4	Cyan
Player 5	Purple

- If your player is offscreen, an arrow the same color as your control symbol points toward him from the edge of the screen. Press the Control Pad in the opposite direction to bring him back onscreen.

Just like in the NBA, offense and defense require different skills in *NBA Live 98*. While the Control Pad is always used to move your player, the buttons have different functions on offense and defense. Learn the controls first, then you can focus on your basketball skills and strategy.

**EA Tip:** When your player's control symbol is pulsing, he's on a hot streak, and his attributes are temporarily boosted.

## OFFENSE

### MOVING WITH AND WITHOUT THE BALL

- Press the Control Pad in the direction that you want to move. You continue to move and dribble as long as you hold down the Control Pad. When you release the Control Pad, you stop moving, but maintain your dribble.
- To execute a crossover dribble or spin move, press **X**. The dribbling move your player executes is determined by his Dribbling rating and his proximity to other players.
- Once you leave your feet to shoot, you must release the ball before you land, or the refs call travelling.
- To run faster, hold down the **R** button while moving. This kicks you into Turbo mode, where you may be able to catch another player from behind or make a lightning drive to the bucket.

If you don't have the ball, you can hand-check your defender to get better position:

- To hand-check, press **A**.
- To give an especially hard hand-check, hold **R** while pressing **A**. (The ref may call you for a foul, though.)

### PASSING

- To pass to the default receiver, press **B**. To retain control of the passer (perfect for give and go plays), hold **B** until the receiver catches the ball.
- To pass to a specific player, use the Control Pad to aim the pass while pressing **B**.
- To throw an alley-oop pass, throw the ball to a player with a clear path to the basket. If he is in a position to jump for an alley-oop, an alley-oop play is automatically executed.
- To call for a pass from a computer-controlled player, press **Y**.

**EA Tip:** Since you can throw the ball faster than you can run, passing is the quickest way to move the ball on the court. Ball movement is the key to offensive success – NBA defenses can contain almost any single player, but good passing gives fits to even the best defense.

### SHOOTING

Players shoot differently depending on whom and where they are. For instance, when shooting from the outside, the player will try a jumpshot. Closer in, and he may try a hook shot. Near the hoop he'll try one of a variety of slams (assuming he *can* slam) or layups.

- To shoot, press and hold **A**. Release the ball at the top of your jump by releasing the button.
- To fake a shot, tap **A**.

**EA Tip:** If SHOT CONTROL in the Set Options menu is set to PLAYER, you'll shoot more accurately if you get your feet set before you shoot and release the ball at the top of your jump.

**EA Tip:** If you press **B** before you release **A**, you can still pass the ball after you leave your feet to shoot.

### REBOUNDING AND TIP-INS

When you don't have the ball, you can crash the boards. If your player has good position, he automatically tries to tip the ball back in the basket.

- To jump to grab a rebound or tip the ball in, press **X**.

### 24 SECOND SHOT CLOCK

From the moment your team gains possession of the ball, you have 24 seconds to get off a shot that hits the rim. Each time the ball hits the rim, a change of possession occurs, or an infraction is called, the clock is reset. The 24-second clock appears at the bottom left of the screen when there are 10 or fewer seconds left.

- ☐ If you don't get a shot off before the 24-second clock expires, the referee calls a shot clock violation, and the other team gets possession.

## DEFENSE

Everyone wants to make the sports highlights with awesome dunks, but to win games you have to play tough D.

### SWITCHING DEFENDERS

You can switch to the defender nearest the ball at any time, assuming he isn't controlled by another human player.

- To take control of the defender closest to the ball (between the ball and basket), press **B**.
- To take control of a specific defender, Control Pad in the direction of the defender and press **B**.

**EA Tip:** Your first order on defense is to stop the ball, so get a man on the ballhandler before he reaches the top of the key. This cuts off easy penetration and slows down the offense.

### STEALS

When you're close to the ballhandler, you can try to reach in and steal the ball.

- To try to steal the ball from an opponent, press **Y**.

**EA Tip:** You have to be close to the man with the ball to pull off a steal. But don't get too aggressive, unless you want to get whistled for a foul.

### SHOT BLOCKING AND REBOUNDING

You can jump to try to block a shot or grab a rebound.

- To jump to reject a shot or work the glass, press **X**.

**EA Tip:** Don't jump for the ball too quickly after a shot or you may get called for goaltending.

### INFRACTIONS

When the refs spot an infraction on the court, they blow the whistle to stop play, and the violation is displayed onscreen.

## FOULS

An offensive player gets to take free throws:

- ☐ When a player is fouled after the defense commits 5 or more team fouls in a quarter, the offensive player gets 2 free throws. Offensive fouls don't count as team fouls.
- ☐ When a player is fouled in the act of shooting, he goes to the line. The basket counts if it is good, and the player gets 1 free throw. If the basket is missed, the player gets 2 free throws (3 if he was fouled while shooting a three-pointer).
- ☐ After a flagrant foul, the offense gets 2 free throws plus possession of the ball.

## FREE THROWS

Use the T-Meter™ to aim your shots from the line. The T-Meter appears when your player goes to the charity stripe.

The ball moves left/right on the horizontal bar to control the left/right accuracy of your shot.

- Press **A** when the ball is in the center of the bar to aim your shot.

The ball moves up/down on the vertical bar to control the distance of your free throw.

- Press **A** when the ball is in the center of the vertical bar. The player shoots the ball, and normal play resumes after the final free throw.

The speed the basketball cursor travels on the bars of the T-Meter is controlled by the player's Free Throw rating – the better the rating, the slower the ball travels.

**EA Tip:** If playing against another human player, there is a definite home court advantage! When the visitor shoots free throws, his opponent can rapidly press **A**, **B**, **X**, or **Y** to animate the home crowd background, making it harder to concentrate on the T-Meter.

## PLAYCALLING

You can assign four different Sets and/or specific Plays for both offense and defense from the Strategy menu, and then call them on the fly during the game. In addition, you can assign offensive and defensive Quick Plays. See *Strategy Menu* on p. 20 for instructions on selecting sets and plays.

- To call the Set/Play assigned to **A**, **B**, **X**, or **Y**, press **SELECT** + **A**, **B**, **X**, or **Y**. If your team has possession of the ball, an offensive play is called; on defense, a defensive play is called.
- To call the Quick Play assigned to **A**, **B**, **X**, or **Y**, press **L** + **A**, **B**, **X**, or **Y**.
- Follow the steps from the animated diagram to execute the play. Computer-controlled players will move as outlined on the diagram, but you must control the actions of the ballhandler.

**Note:** The plays and sets are guidelines, but NBA players aren't robots— you make the play happen. We've drawn the X's and O's, but it's up to you to orchestrate your team.

## PAUSE MENU

The Pause menu appears whenever you press **START** during a game. You must pause the game to call a time out, make a substitution, or choose from other menu options. The **TIME OUT** and **SUBSTITUTION** options are not always available – for instance, you can make a substitution only when the play clock is stopped. When options are grayed out, they cannot be selected.

## TIME OUTS

You can pause the game at any time, but you must have possession of the ball to call a time out. The number of time outs remaining is listed after **TIME OUT** in the Pause menu. Each team gets 7 time outs per game. (If you call a time out after your 7 are exhausted, the time out is granted and a technical foul is called. Following the time out, the ball is awarded to the opposing team and play resumes with a throw-in nearest the spot where play was interrupted.)

### To call a time out:

Highlight **TIME OUT** from the Pause menu and press **B**. The **SUBSTITUTION** option becomes available if it was not already.

## SUBSTITUTION

You can make player substitutions when the play clock is stopped between periods, by a time out, or by a violation such as a foul or out of bounds. When the clock is not stopped, the **SUBSTITUTION** option isn't available.

### To make a substitution:

1. When the clock is stopped, select **SUBSTITUTION** from the Pause menu. The Substitution screen lists the 5 players currently in the game.
- To toggle between the two teams to check out your opponent's line-up, press **L/R**. (You can only make substitutions for the team you control, however.)
- To cycle between game stats, player ratings, 1996-97 stats, and season/playoff stats (if applicable), press **X**.
- To cycle through the available statistics/ratings for the players, Control Pad  $\leftrightarrow$ .
2. To highlight a player for substitution, Control Pad  $\uparrow$ .
3. To substitute for the highlighted player, press **A**. A screen listing the available bench players appears.
4. Highlight a bench player, and press **A** to insert that player into the lineup. To return to the Pause menu, press **START** or **SELECT**.

**EA Tip:** Try to sub in a player who plays the same position as the player you're replacing – don't put a center in for the point guard.

## REPLAY

You can replay the last few seconds of action during the game.

- Select REPLAY from the Pause menu. An overlay displaying the game clock and the button functions appears at the bottom of the screen.

- To move the center of the Replay screen, Control Pad in any direction.
- To toggle between normal and reverse angle, press **SELECT**.

## STRATEGY MENU

### OFFENSIVE PLAYS

Go to the Offensive Plays menu to select offensive plays and strategy. You can have the computer automatically choose sets and plays, or you can choose four sets/plays to call during the action.

#### CPU SELECTS

Select this option to have the computer automatically select your offensive sets and plays. (But you can still call your own plays when you want.) When set to OFF, you call all your plays manually, and any play or set you call is run until you call another.

- To toggle an option ON/OFF, highlight the option and press **A**. A dot appears next to a selected option.

#### CRASH BOARDS

Go after offensive rebounds aggressively if ON, and get back on defense if OFF.

#### OFFENSIVE SETS AND PLAYS

Seven offensive sets are available in *NBA Live 98*, and each set contains from 4–10 plays.

Animated  
play diagram

Press **A**, **B**, **X**, or **Y** to assign highlighted play to button.

- To cycle through the plays for the highlighted set, Control Pad  $\leftrightarrow$ .

As you select plays, the animated diagram on the right displays the motion of the players and the ball. In the diagram:

- 1** Point Guard    **2** Shooting Guard    **3** Small Forward  
**4** Power Forward    **5** Center    ○ Player with the ball

The first play in each set has an "A" for automatic after it. When an Automatic play is selected, the computer randomly chooses a play from the offensive set when that set is called, and then keeps calling plays from that set until another set or play is called. If you select a specific play (i.e., any play other than "A"), that play is run until you select another.

- To select the highlighted set/play and assign it to a button, press **A**, **B**, **X**, or **Y**. The selected play is assigned to that button, and any other play assigned to that button is cleared.
- To call the appropriate play during the game, press **SELECT** + **A**, **B**, **X**, or **Y**.

### DEFENSIVE SETS

Go to Defensive Sets screen to select defensive sets and options.

#### CPU SELECTS

When set to ON, the computer selects defensive sets automatically. When set to OFF, any defensive set you call is maintained until you call a different set.

### PRESSURE

Select **LOW**, **MEDIUM**, or **HIGH** defensive pressure. Higher pressure may lead to more steals, but also more fouls.

### DEFENSIVE SETS

Five defensive sets are available, including man-to-man and trapping sets. The clipboard diagram on the right side of the screen shows the alignment for the highlighted set. Sets are selected and called in the same manner as offensive sets, except that there are no individual plays – only basic sets.

### OFFENSIVE QUICK PLAYS

In the NBA, a basic play such as a pick and roll between a point guard and a power forward can be the cornerstone of a team's offensive success. In *NBA Live 98*, you can call your own NBA-style Quick Plays on the fly. Quick Plays differ from standard plays in that they are quick, simple, and can be run from any set (but do not alter the set).

Quick Plays are selected and called in the same manner as plays, and any button assigned to a Quick Play overwrites any other offensive set or play assigned to that button. The diagrams show a typical situation in which the Quick Play can be called. However, the plays will execute differently depending on which player calls the play and where the player is located on the court. Experiment for best results.

- To call the appropriate Quick Play during the game, press **L + A, B, X, or Y**.

### DEFENSIVE QUICK PLAYS

The two Defensive Quick Plays let you stop the clock with a foul or double-team the ballhandler without altering your basic defensive set.

### INSTANT FOUL

Computer players try to foul the ball handler to stop the clock.

### DOUBLE TEAM

Computer players try to double-team the ballhandler.

- To call the appropriate Quick Play during the game, press **L + X or Y**.

### DEFENSIVE MATCHUPS

Go to Defensive Matchups screen.

- To select the highlighted player, press **A**.
- To change the opposing player that the selected player guards, highlight the player you want to guard, and press **A** again. The player who was guarding the man you selected now guards your original man.
- To toggle double-teaming on (**Y**) or off (**N**) for the selected player, Control Pad  $\leftrightarrow$ . When on, the computer-controlled defensive players try to double-team the ballhandler.

**EA Tip:** Double-teaming is a good way to shut down a player who's lighting you up.

### SUBSTITUTION

Toggle between **MANUAL** and **AUTO** player substitution. When set to **AUTO**, the computer subs for tired players automatically.

## PRACTICE MODES

A new feature in NBA Live 98 is the ability to set up 2 ON 2 or 3 ON 3 Half Court games, Team or Player Practice sessions, as well as a 3 Point Contest. Use these 'mini-games' to sharpen your skills or get a little quick and dirty competition going.

### 2-ON-2 OR 3-ON-3 HALF COURT

Selecting either of these modes places you in a halfcourt practice game to a specified number of points. Arcade rules are in effect, so don't look for the refs to bail you out with a call when you get fouled on the way to the hoop. Define just how quick you want this competition to last from the Game Setup menu.

#### POINTS

Set the number of points it takes to win to 7, 11, 15, 21, 30, or 50. The first team to the specified point total, with a 2 point lead, wins the game.

### KNOCKOUT STYLE

Select **LOSER'S OUTS** to let the other team inbound the ball after a basket or **WINNER'S OUTS** to give the ball back to the team who makes the bucket. Winner's outs make it easier to get on a run; loser's outs ensure a more balanced game.

### BASKET PTS

Select 1 AND 2 POINT or **2 AND 3 POINT BASKETS** to set the scoring for normal shots and shots from behind the 3-point line.

1. When you continue from the Game Setup screen, the 2 on 2 (or 3 on 3) Setup screen appears. To toggle between team slots, press **A**; to cycle through teams, press **L/R**; to highlight a player slot, Control Pad  $\uparrow$ ; to cycle through players for the highlighted slot, Control Pad  $\leftrightarrow$ .

- Select your team by pressing Control Pad  $\leftrightarrow$  and **START** to select. After choosing your controller setup, your team will be on the court waiting for their drills.

- Select your team and player(s) by pressing Control Pad  $\leftrightarrow$  and **START** to select.
- After the Practice Session, you can view all of your favorite stats, including Best Practice Player, from the game.
